

How To Ace Your Job Interview And Get The Job You Want

An Express Workshop by Brian Lee

- * Are you going to attend a job interview?
- * Are you worried about doing well?
- * Do you wish you can know how to correctly answer interview questions?
- * Do you want to know what NOT to do so you don't screw up the chance to get the job you want?
- * Do you want to know how to make the interviewer pick you from among all the others, including those with more experience than you?

Job Interviews are very important. You only have a very, very limited time to convince the interviewer that you are the right one for the job. If you don't prepare enough, the interviewers will know and immediately downlist you, if not reject you altogether. Say the wrong thing, and you're out the door.

If you don't do the right things, you will lose the job you dream of to one of the many other candidates. In short, if you don't know what you are doing, you have no chance at all. You may as well say goodbye to that job you are aiming for.

The good news is, you can avoid all of this. If you know what you need to know, not only will you dramatically increase your chance of winning that job, you will likely find it easier and smoother too.

There are things you can quickly learn so you can focus only on the 20% of effort that gets you 80% of the results. So instead of focussing so much on the job interview itself, you can have the peace of mind to focus on which job is the right one for your long term career.

You do want a career that brings you satisfaction and happiness, do you not? If you answer yes, this course is designed for people just like you.
